Products & Services:

Common Construction LLC is a certified Minority Business Enterprise specializing in the procurement and supply of Division 10 commercial specialties and related building products. Core product lines include toilet accessories, toilet partitions, metal lockers, visual display boards, access doors, corner guards, and other Division 10 specialty materials specified for commercial, educational, municipal, and government projects. The company purchases directly from manufacturers and coordinates submittals, logistics, and direct shipment to project sites. Common Construction operates as a material supplier and does not self-perform installation. When a project requires a furnished-and-installed package, labor is subcontracted to qualified union installation partners while Common Construction retains responsibility for the subcontracted scope and supply chain coordination. Value-added services include material takeoff, specification review, product sourcing, submittal preparation, material compliance verification, and purchase order tracking. The company delivers statewide and regionally.
